

The photo to the left was taken in Kenya. The women are weavers who come to work together at an orphanage. LED lamps (seen on the table) will help the children & women do their work in the evenings. Some lamps also went to a school.

The photo below shows Dr. Jan with two elderly Dominican women. These women were living alone and had no families to help them. They now have LED/solar lighting systems & no risk of fire.

The photo to the right shows a typical Dominican house with the little 5 watt panel up on the roof (top right).

The photo above shows a meeting of a "Mother's Center" group in the Dominican Republic. Several of these women have LED lighting systems & Biosand water filters, all through small loans.
