

These two photos show delegates from several "Mother's Centers" in the D.R. gathering to find out how they can access small loans and how each group will guarantee an individual's loan.

The photo below shows the loans administrator, Adis Rodriguez, signing the first two loan contracts. She is working in the Community Action Center, which was built by Add Your Light so that the Dominican NGO would have a base from which to work.

Small loans are being made available for small business start-ups, house repairs, concrete floors, Biosand filters, and the LED/solar lighting systems.

The photo to the right shows Jan speaking with a woman who has LED lamps in her restaurant. She no longer worries about black-outs at night.
